Projects:

- **Payment Integration,2020 [Website](#)**

This project is for a Chinese Company .Stripe Gateway is used here to deposit and withdraw...People can deposit money via credit card to this website and the company provides less interest.

- **E commerce project, 2020 [Website](#)**

This project is developed by html5,css3,bootstrap,js ,laravel,ajax and my sql.
This is a Multipurpose E commerce Site With Pos System...

- **Educational Management System, 2020 [Git Repository](#)**

This system can effectively maintain the data pertaining to examination, financial issues; facilities and assets management of the institutions. To sum up, school management information systems not only eases the office work but also ensures the efficient functioning of the schools. It makes possible a more effective way of storage and distribution of information and keeps all the records of students ,teachers and stuff.

- **Job Portal System ,2019 [Git Repository](#)**

On this System Admin can post a job and employees can apply according to their skill with their necessary information and CV .But no duplicate CV can allow.

- **Html,CSS,JS,Bootstrap,php**

Restaurant Project , E commerce Project , Online Blood Management Project, Online Tuition Media Project

- **Android Development**

3

4

University Management , Book Indexing , Newspaper Project

- **Home Automation Project, 2018**

This project was under a Eee course. Here I developed an automatic motor to control water storing in tanks which will automatically turn off/on when the tank is filled up or out.I used an Arduino and a sensor as main tools. Again the automated light on/off controller was made by me where I used the Bluetooth module to turn off or on the lights via smartphone .

The End
